

21/5000 Sweden's best Dairy

In collaboration with Skånemejerier and SRC, we have raised the Dairy Department to be the best.

We first do a so-called Survey where we measure, take pictures and draw the department. Then we send documentation to the agency SRC which puts together the original.

Gigantprint prints and takes care of the assembly and in the pictures you can see the results on ramps, navigation moldings, floor decals etc. are included in the concept.

Materials used are Stadurlon with black core, Forex, plexi (acrylic), floor vinyls etc.

Congratulations to Ica Kvantum Vellinge, we say at Gigantprint and thank you for the assignment Skånemejerier.

We have a well-functioning dialogue with the customer, the agency and the fitters that makes it a perfect result.

Richard Happach
Project manager / salesman
